

Présentation

Fairfax est une marque anglaise, de haut niveau, de selles, sangles et accessoires, scientifiquement prouvés. La marque est fidèle à la science. Elle utilise les études scientifiques pour créer et améliorer la conception des équipements.

Pour Fairfax, la philosophie est simple :

- Améliorer la liberté de mouvement du cheval
- Renforcer la communication
- Vous permettre de réaliser de meilleurs résultats

"I base my designs on facts, not opinions or guesswork" - Vanessa Fairfax

Le Product Designer - Vanessa Fairfax :

Championne internationale de CSO, Vanessa Fairfax conçoit et fabrique des selles depuis plus de 20 ans.

Elle utilise, à travers tout le processus de développement, une combinaison de :

- cartographie de pression Pliance (évaluation de la pression sur le corps du cheval)
- analyse d'allures Centaur Biomechanics (fournie des informations détaillées sur les angles des articulations et des membres).

Ces mesures permettent de voir et de mesurer la différence dans l'extension, la flexion et dans la liberté de mouvement du cheval.

Les recherches les plus récentes sur les selles ont examiné la synchronisation cheval & cavalier et l'importance de la position du cavalier.

La recherche et l'innovation continue entrepris par Fairfax a amené la marque à obtenir la Queen's Award pour l'innovation, un accomplissement unique dans l'industrie de la fabrication de selles.

Les selles Fairfax

World Class Monoflap Dressage Saddle

with the Performance Panel

Patent: GB2515079

Chosen by Charlotte Dujardin and developed to maximise synchronicity, this dressage saddle allows the rider to feel more balanced and 'at one' with their horse.

[More details](#)

World Class with Elias Panel

with the Performance Panel

Patent: GB2515079

Developed to maximise synchronicity between riders and horses with an 'uphill' conformation.

[More details](#)

Fairfax Elias Monoflap Saddle

with the Performance Panel

Patent: GB2515079

Renowned Friesian breeder and Grand Prix dressage rider Marc-Peter Spahn had always struggled to find a saddle to fit the 'uphill' conformation of the breed. 'Now, thanks to Fairfax, my horses use their back better, and I feel more balanced with a closer contact', he says.

Fairfax Gareth Monoflap Dressage Saddle

with the Performance Panel

Patent: GB2515079

We developed this saddle with 2014 WEG team silver medalist Gareth Hughes who wanted a saddle that allowed him to feel a greater connection with his horse without restricting the ability to give the subtlest aids or make minute adjustments.

[More details](#)

Fairfax Rebecca Monoflap Dressage Saddle

with the Performance Panel

Patent: GB2515079

Following the unprecedented success of the Fairfax Gareth Dressage Monoflap saddle, we started to receive repeated requests for a more 'feminine' version. So we asked renowned producer of young dressage horses and equestrian style icon Rebecca Hughes to add some luxurious design touches.

Fairfax Spencer Monoflap Dressage Saddle

with the Performance Panel

Patent: GB2515079

Olympic medalist Spencer Wilton has been working with Fairfax for more than two years to refine and perfect this model that is stamped with his personal touch. It features a new tree design that offers a roomier seat, plus a unique concealed, moveable knee block.

[More details](#)

Fairfax Andrew Hoy Monoflap XC

with the Performance Panel

Patent: GB2515079B

Developed with seven-times Olympian Andrew Hoy to enable him to feel a greater harmony with his horses, the specifically designed seat aligns the rider precisely over the horse's centre of balance, enabling them both to perform at their best.

[More details](#)

Fairfax Harry Meade Monoflap XC

Developed with World Silver medalist Harry Meade to give a really close contact feeling between horse and rider. The specially-designed slimline foam panel has undergone extensive development and rigorous testing using Biomechanics pressure mapping and gait analysis. Scientific trials show that this design gives as much support and stability as our Performance Panel and allows the horse to flex and use his back on take-off without restriction.

[More details](#)

Fairfax Spirit Jump

with the Performance Panel

Patent: GB2515079B

Designed specifically with show jumpers in mind, the panel concept de-restricts the shoulder and knee apparatus in flight, allowing the horse greater freedom of movement and therefore increased clearance over the fence. The slim-line design improves the rider's sense of connectivity with their horse, aiding unity and a closer leg contact.

Fairfax Classic Cupped Flap Dressage

A traditional two-flap created especially for the competitive rider who appreciates enhanced comfort and luxury from their competitive saddle. Designed using the research and development that went in to our Performance Products to ensure the horse benefits from Fairfax's fitting features and girthing options.

[More details](#)

Fairfax Classic Open Seat Dressage

A traditional two-flap dressage created especially for the rider who appreciates a little more room in their saddle seat, or a feeling of 'space'. Crafted using top quality English leather especially for those who appreciate enhanced comfort and luxury in their dressage saddle. Designed using the research and development that went in to our Performance Products to ensure the horse benefits from Fairfax's fitting features and girthing options.

[More details](#)

Fairfax Classic Petite Dressage

A traditional two-flap created especially for the petite or young competitive rider who appreciates enhanced comfort and luxury from their dressage saddle. Designed using the research and development that went in to our Performance Products to ensure the horse benefits from Fairfax's fitting features and girthing options.

[More details](#)

Fairfax Classic GPD

Straighter-cut flaps than the Classic GP make this the perfect choice for the rider who likes to do a bit of everything – but whose main interests are flatwork, schooling and dressage. The Classic GPD benefits from the same comfort and luxury afforded by the Classic GP. Comfort for the horse is provided by the fitting features developed as a result of Fairfax's extensive research and testing for the development of our Performance saddles.

[More details](#)

Fairfax Classic Jump Cupped Flap

A traditional two-flap saddle, specifically designed for the competitive rider looking to achieve a closer connectivity with their horse when jumping. While the rider appreciates the enhanced comfort and luxury afforded by this saddle, the horse benefits from all the research and development that went in to our Performance Products, including multiple girthing options and fitting features.

[More details](#)

Fairfax Classic Jump Plain Flap

The Classic Jump Plain Pad offers a more minimalist look and closer contact feel for the rider who doesn't need the additional support provided by the larger block of our Classic Jump model. Rider comfort is by no means compromised – this luxurious saddle is made from the finest English leather, while multiple girthing options help achieve a perfectly fine-tuned fit.

[More details](#)

Fairfax Classic Monoflap XC Big Block

Designed for the competitive cross-country rider who prefers plenty of knee and leg support while still achieving a close contact feel with their horse, thanks to the monoflap design.

[More details](#)

Fairfax Classic GP

A high-comfort GP for all types of riding and competition, with a little extra luxury and support. The horse benefits from Fairfax's fitting features and girthing options thanks to all the research and development that has gone into our Performance Products.

[More details](#)

Fairfax Classic Monoflap XC Small Block

A monoflap saddle, specifically designed for the competitive cross-country rider looking to achieve a close contact with their horse. While the rider appreciates the comfort and good looks of this saddle, the horse benefits from all the research and development that went in to our Performance Products, including unique monoflap girthing options.

Les sangles Fairfax

« La seule sangle développée en utilisant des essais scientifiques ».

1. Forme unique évite les endroits où la pression maximale est généralement localisée.
2. La combinaison de la forme anatomique et la matelassure créent une zone tampon et empêchent d'avoir un contour « dur ».
3. Une nouvelle méthode permet à la zone tampon « de flotter » et de guider la masse musculaire sous la sangle, au lieu de la bloquer.
4. La sangle est doublée de Prolite® - connu pour sa capacité à répartir la pression, à absorber les impacts et à empêcher les frottements.

A Prolite cushioned buffer zone guides the muscle bulk under the girth rather than blocking it.

The Performance girth's unique shape avoids the areas on the horse where extremely high pressure peaks are located.

Dressage Girth

Short girth for use with dressage saddles

[More details](#)

Narrow Gauge Dressage Girth

Short girth for use with dressage saddles on horses with a narrower ribcage. Find out how to measure here

[More details](#)

Short Event Girth

Short girth with ring and buckle for training aid or martingale. Use with dressage or monoflap saddles

[More details](#)

Narrow Gauge Short Event Girth
